

# 6th Non-Volatile Memories Workshop

La Jolla, California USA

March, 1-3 2015

<http://nvmw.eng.ucsd.edu>

## NVMW 2015

### Organizers

Paul Siegel, UCSD ECE/CMRR

Eitan Yaakobi, Technion

Steven Swanson, UCSD CSE

### Program Committee

Idan Aldroid, SanDisk

Remzi H. Arpaci-Dusseau, Univ. of Wisconsin

Anirudh Badam, Microsoft Research

Zvonimir Bandic, HGST

Mario Blaum, IBM

Yuval Cassuto, Technion

Christophe Chevallier,

Bruce Childers, Univ. of Pittsburgh

John Davis, Microsoft Research

Peter Desnoyers, Northwestern University

Lara Dolocek, UCLA

Blake Fitch, IBM

Maya Gokhale, LLNL

Kiran Gunnam, HGST

Erich Haratsch, Seagate

Andrew Jiang, Texas A & M

Edwin Kan, Cornell University

Mike Mesnier, Intel

Ethan Miller, UC Santa Cruz

Ravi Motwani, Intel

Shruti Patil, Univ. of Minnesota

Narasimha Reddy, Texas A & M

Eran Sharon, SanDisk

Mircea Stam, Univ. of Virginia

Nisha Talagala, FusionIO

Hironori Uchikawa, Toshiba

### Presented By

<http://cmrr.ucsd.edu>

<http://nvsl.ucsd.edu>

The 6th Annual Non-Volatile Memories Workshop (NVMW 2015) provides a unique showcase for outstanding research on solid state, non-volatile memories. It features a "vertically integrated" program that includes presentations on devices, data encoding, systems architecture, and applications related to these exciting new data storage technologies. Last year's workshop (NVMW 2014) included 32 speakers from top universities, industrial research labs, and device manufacturers and attracted over 230 attendees. (The website for NVMW 2014 can be found at <http://nvmw.eng.ucsd.edu/2014>.) NVMW 2015 will build on this success.

The organizing committee is soliciting presentations on any topic related to non-volatile, solid state memories, including:

- Advances in memory devices or memory cell design.
- Characterization of commercial or experimental memory devices.
- Error correction and data encoding schemes for non-volatile memories.
- Advances in non-volatile memory-based storage systems.
- Operating system and file system designs for non-volatile memories.
- Security and reliability of solid-state storage systems.
- Applications of non-volatile memories to scientific, "big data", and high-performance workloads.
- Implications of non-volatile memories for applications such as databases and NoSQL systems

The goal is to facilitate the exchange of the latest ideas, insights, and knowledge that can propel future progress. To that end, presentations may include new results or work that has already been published during the 18 months prior to the submission deadline. In lieu of printed proceedings, we will post the slides and extended abstracts of the presentations online. Presentation of new work at the workshop does not preclude future publication.

Workshop submissions should be in the form of a 2-page presentation abstract. Submissions will be evaluated on the basis of impact, novelty, and general interest.

**The submission deadline is December, 12th 2014, with notification of acceptance by January, 26th 2015.**

Further details on abstract submission, technical program, tutorials, travel, social program, and travel grants will be provided at the workshop website:

<http://nvmw.eng.ucsd.edu>
